

Multifunctional tool for automotive CANbus processing

Two in one device – contactless reader and FMS gateway

- No configuration required.
- Easy connected and firmly fastened to CANH and CANL wires.
- Power-supplied from onboard electrical network.
- Protected from polarity reversal and interferences in onboard network.

**Input – CAN (J1939)
Output – CAN/S6 (FMS, Telematics)**

* Telematics messages contain most important information on vehicle operation. FMS gateway gathers messages by scanning CAN bus.
