

-  Real time monitoring of fuel volume in tank
-  Online monitoring of fuel refilling and discharging
-  Fuel consumption online monitoring
-  Determining exact places of refilling
-  Fuel refilling and discharging from tank

## DUT-E GSM fuel level sensor: sending fuel volume and vehicle position data directly to a server via GSM network

### Vehicle parameters monitored:

- real time position over GPS;
- speed, travel and rest time;
- fuel volume in tank;
- fuel consumption from tank;
- fuel refilling and discharging from tank.
